On January 16, 2021, the Department of Justice lodged a proposed consent decree modification with the United States District Court for the District of New Jersey in the lawsuit entitled *United States v. The Sherwin-Williams Company*, Civil Action No. 1:19–cv–01907–JHR–KMW, an action brought under the Comprehensive Environmental Response, Compensation, and Liability Act (“CERCLA”), 42 U.S.C. 9601 *et seq.* On April 16, 2019, the Court entered a consent decree in this action which resolved the United States’ claim against The Sherwin-Williams Company (“Sherwin-Williams”) for certain past costs incurred by the United States relating to the Sherwin-Williams/Hilliards Creek Site, Route 561 Dump Site, and United States Avenue Burn Site (the “Sites”). The Sites are located in Gibbsboro and Voorhees, New Jersey.

The consent decree entered in this action also provides for Sherwin-Williams’ performance of the soils and sediments operable unit remedy selected by the U.S. Environmental Protection Agency (“EPA”) for the United States Avenue Burn Site. In addition, the consent decree provides that, after EPA selects a remedy in a Record of Decision (“ROD”) for an additional operable unit at the Sites, the decree may be modified to add Sherwin-Williams’ performance of the additional operable unit remedy to the work required under the decree. On August 4, 2020, EPA issued a ROD selecting the remedy for the soils, sediments, and light non-aqueous phase liquid (“LNAPL”) operable unit at the Sherwin-Williams/Hilliards Creek Site (“SW/HC OU2”). The selected remedy includes contaminated soil and sediment removal, cap installation, and bioremediation work. The SW/HC OU2 ROD is accessible at <https://semspub.epa.gov/work/02/598791.pdf>.

The proposed consent decree modification lodged with the Court on January 16, 2021, provides for Sherwin-Williams’ performance of the remedy selected in the SW/HC OU2 ROD in accordance with the decree and the statement of work attached to the proposed consent decree modification.
